How do I use PDF files in an exam?

PDFs can be added to an exam or to different items:

- Link one or more [PDF\('s\) to the entire exam](#). Students can access this document during the entire exam.
- Link one or more [PDF\('s\) to an item](#). Students can only access this document when they are on that particular question.
- Link one or more [PDF\('s\) to a section](#). Students can open this file

Link one PDF to the entire exam

It is possible to link one or multiple PDF files to the entire exam. This will be setup on the introduction page. Students can click on the resource/resources button to open the files. After that students can always navigate backup to the introduction page to open the pdf. Review the article [how do I make a page](#) for more information about creating the introduction page

It is also possible to link a pdf to an exam which will take place on campus on a Chromebook or Chromebox. Please contact your faculty's digital assessment coordinator for more information.

- FdR: Paul Morel and Dion Legters (email: digitalassessment-fdr@ru.nl)
- FdL: Carine Eskes (email: digitalassessment-fdl@ru.nl)
- FMW: Sandra Sünner and Nicole Sampers (email: digitaletoesen.rha@radboudumc.nl)
- FTR: Erik Denessen (email: digitalassessment-ftr@ru.nl)

Link a PDF to an item

It is possible to add a PDF file to each question and page. See [Which item types can be used?](#) for more information about the different item types and how to use them. On these specific instruction pages you will find information about adding PDFs.
